

“COMBINUM is a powerful sales configurator that helps you to make the flow of orders more effective by letting customers and sellers configure orders directly on the Internet.”

COMBINUM simplifies and makes the flow of orders more effective for complex products. The product specialist's knowledge gets accessible for everyone when it is built into COMBINUM. Manual routine work, calculations and check ups are automatized.

COMBINUM helps your company to:

- increase the turnover
- increase customer loyalty
- maximize accessibility
- improve ways of communication
- speed up the information process
- shorten lead time
- decrease errors and revisions
- release resources
- take new market shares

COMBINUM
ADVANCED SALES CONFIGURATOR

WEB

COMBINUM sales configurator is completely web based. The architecture gives you total freedom when selecting who is going to use the configurator. Example of users inside and outside the company is:

- customers
- in-house sellers
- distributors
- production
- field sellers
- support

INCREASES AVAILABILITY

In a globalized world availability and efficient communications are two key factors to success. With COMBINUM new possibilities are made:

- customers and sellers can configure and submit orders 24 hours a day, all year round
- COMBINUM guides the user to correct configurations and the product specialist doesn't represent a production bottleneck anymore
- new products and options are globally available in a moment's notice.

AUTOMATIZE

A lot of manual work is avoided since COMBINUM with help of its rules of regulations automatically can show:

- prices
- graphics
- product keys
- picking lists
- operations
- document links
- reports

REDUCE MISTAKES

With COMBINUM you build in the product specialist's knowledge into the rules of regulations and avoid mistakes caused by lack of knowledge or carelessness. With correctly made rules of regulation in COMBINUM you know that you at every occasion get:

- technically correct and complete configurations
- correct prices
- correct documentation
- picking list with right items, quantity and dimensions
- ways of operations with the correct process actions and times
- correct assembly instructions

INCREASED LOYALTY

With COMBINUM it is easy for customers to configure and order products directly from the web when it is suitable for them. The customer gets the price, documentation and graphics adjusted to the design of the product. A more efficient flow of orders with faster deliveries, increased availability and better support equals increased customer loyalty.

COMPLETE SOLUTION

COMBINUM is the complete configuration solution and it can automatize the whole configuration process. Many customers still want to integrate COMBINUM with existing systems. COMBINUM can get integrated seamlessly with existing systems by its powerful and open architecture.
